

Dear participants,

The “Poster highlights” session has to be arranged in advance.

In order to be prepared for the “Poster highlights” session, at which you will have the opportunity to draw the audience attention to your poster and invite participants to visit your poster during the poster session and if you want to use slides during your poster highlights slot, please **send us your 2-5 slide “presentation” of your poster by 02.09.2014.**

Please refer to your poster by the designated number (from the poster list), the title of the poster, the authors and their affiliations on the first (title) slide. Bare in mind that this is not a classical work presentation, don't try to explain your work, but just to draw the audience attention so that the ones interested in your work will visit you at the poster during the poster sessions.

The presentation should be sent at: ict-act@finki.ukim.mk, subject “Poster presentation”

Poster list

1	Jian-Qin Liu and Wuyi Yue. "A New Networked Filter Method for Robust Stability Analysis of Software Defined Networks"
2	Nenad Kojic, Irini Reljin, Branimir Reljin. "Hopfield Neural Network for Dynamic Routing Based on Multi Parameters"
3	Mihaela Carina Raportaru. "Thermal transition in nonlinear lattices"
4	Angel Janev and Momčilo Ranđelović. "Online algebra generator and web generated presentation of technical, especially mathematical expressions which contain variables"
5	Angel Janev and Momčilo Ranđelović. "Online generator of dynamic generated geometrical forms, Web generated representation of geometrical shapes"
6	Nikola Slavkovic, Ana Savic, Natalija Vugdelija. "The Analyses of Relationship Between the Country`s Level of Development and Digital Literacy through the Digital Natives Activity in Serbia"
7	Ana Savic, Nenad Kojic, Nikola Slavkovic. "Risk Prediction According to Basel III Based on Artificial Intelligence"
8	Roberto Pasic, Ilija Jolevski, Aleksandar Markoski. "Vehicle sensor node for smart parking's of the future"
9	Karen Duarte, Jose Cecilio, Jorge Sa Silva, and Pedro Furtado. "Assistive system for Blind People on Shopping"
10	Milan Pavlović, Dragan Ristić, Irini Reljin, Miomir Mijić. "Using nonlinear signal processing in detecting reflections in room impulse response"
11	Dimitrija Angelkov and Cveta Martinovska. "Control and Monitoring Winemaking Process Online"

12	Marko S. Andjelkovic, Goran S. Ristic. "Current Mode Ionizing Radiation Dosimetry: An Overview of the State of the Art"
